

Vodafone One Net Business: the integrated communications service

No missed calls – your evolution towards a fixed and mobile converged solution

Vodafone
Power to you

Designed for businesses looking to maximise revenue by improving connections with customers, and boost productivity

Vodafone’s hosted Unified Communications (UC) services provide all the benefits of

- voice including hunt groups, conference calling, call centre and receptionist functionality,
- instant messaging (chat) and presence,
- video collaboration,
- and content sharing

through a single, cloud-based platform to keep your business better connected.

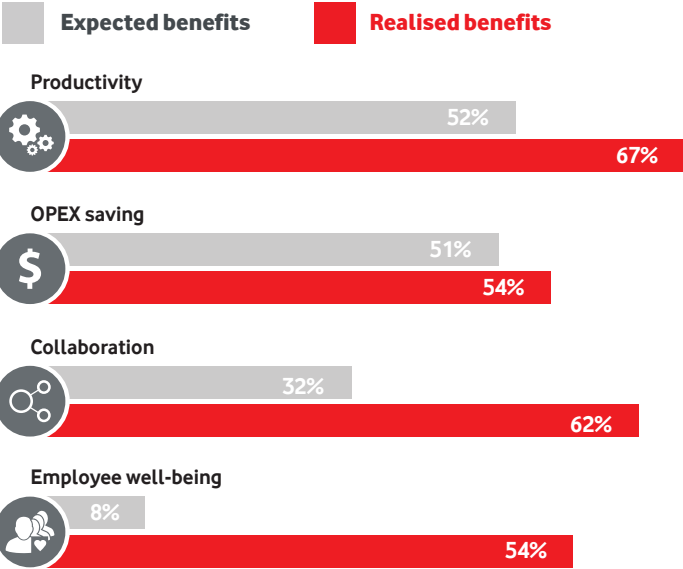

Ready today, prepared for tomorrow

Today there are so many ways to connect - without converged streamlined communications the risk of missing an opportunity increases. Vodafone One Net Business lets your business focus on your core strengths, safe in the knowledge that however you and your customers choose to communicate you’ll be able to respond and deliver.

“SMBs are looking for technologies and tools to help them consolidate their communications infrastructure, integrate applications, and reduce the cost and complexity of ownership.”

FROST & SULLIVAN

Organisations want to move to Unified Communications for key benefits:

Award winning integrated communications services from Vodafone

Features and benefits

Vodafone provides greater agility, productivity and efficiency with less complex solutions.

Feature	Benefit
Integrates fixed and mobile	Fewer missed calls, better customer experience and easy adaptability. Direct, monitor and switch calls whenever needed.
One number, one voicemail	No need for a separate landline and mobile number.
Hosted in the cloud and on our robust and substantial network	Getting rid of maintenance fees for on-site equipment reduces cost and complexity for the business.
Presence and messaging (chat)	Save time finding team members and use instant messaging for quick communications.
Collaboration	More than 100 collaboration tools to make it even easier to stay in touch with colleagues and customers. It combines One Net Business with Business Apps and Services, such as Skype for Business, Google, or Mobile Device Management to let you answer calls on your fixed phone, mobile, tablet or computer.
Pay as you need, for what you need	You pay for the service you use, making it easy to grow with your business.
New features released in the cloud	New capabilities, ideal for a Ready Business, will be provided as they become available, keeping your business one step ahead.
Bring Your Own Device	Better employee experience. Recruit and retain the best talent by offering BYOD and Flexible Working solutions.
Fully managed service	Reduced management time, skills recruitment, maintenance and support. This is all included in Vodafone's service.
Customer administration control	Provides service information and control via the online Feature Management Portal.

Why Vodafone One Net Business?

If you would like to integrate mobile and fixed networks, Vodafone One Net Business is the right solution for you. We help you reduce lost calls, boost productivity, and as a service managed end to end, Vodafone takes care of everything so that you can focus on improving efficiency with reduced monthly costs. Join millions of One Net Business users across the globe and let us manage your wider telecommunication needs through our great range of services including mobile, security, email and document management.

Why is hosted UC better than traditional, on-premise UC?

One package	Mobile and fixed access, single support route, fully converged user experience, single bill
Simplicity	Configurable for each user, easy to understand, intuitive, always upgraded to the latest feature capabilities
Cost saving	Optimal mobile tariffs
