

One Net **Mobile**

Step by step to One Net Business

One Net Mobile offers a first step to Unified Communications and full adoption of Vodafone One Net Business.

If you're still under contract for your PBX (telephone system) and fixed services, One Net Mobile lets you move your mobiles to Vodafone now – and get many of the benefits of One Net Business – and move your fixed lines across when you're ready.

One Net Mobile provides the same core functionality and features as One Net Business but without the fixed line integration.

It delivers many benefits almost immediately.

For more information about One Net Mobile, please visit onenet.vodafone.com or call us for a chat on **0808 004 4495** (10-50 employees) **0845 241 9560** (51+ employees).

You decide how calls are routed.

Intelligent call handling features such as Hunt Groups ensure calls are always answered by the right person and you no longer need to set up expensive call diverts.

You're in control. Our online Feature Management Portal and mobile app lets you manage your call features and profiles.

Decide how you're contactable.

Choose how to route calls when you're unavailable, away or it's outside working hours – allow a colleague in your mobile Hunt Group to answer for you, or collect a voicemail.

Control your costs. Our mobile price plans give you a shared data allowance, data capping, inclusive roaming, plus international and non-geographic call bundles.

Integrate your fixed services. When you're ready to move your fixed services over, it's easy to upgrade you to the complete One Net Business solution.

One Net Mobile

- A reliable connection
- One voicemail for your business
- Future-proofed technology
- Always ready to answer
- You're in control
- Direct your calls
