

One Net Office

Step by step to One Net Business

One Net Office offers a first step to Unified Communications and the full adoption of Vodafone One Net Business.

If you're still under contract for your mobile services, One Net Office lets you move your PBX (telephone system) and fixed lines to Vodafone now – to get many of the benefits of One Net Business – and move your mobiles across when you're ready.

It creates a fully hosted telephone system, with VOIP technology, to which you can add collaboration tools.

It delivers many benefits almost immediately.

For more information about One Net Office, please visit onenet.vodafone.com or call us for a chat on **0808 004 4495** (10-50 employees) **0845 241 9560** (51+ employees).

Cost savings. No need to buy or lease an on-site phone system or pay out for regular maintenance and upgrades.

You decide how calls are routed. Intelligent call handling features such as Hunt Groups and Auto Attendant ensure calls are always answered by the right person.

You're in control. The online Feature Management Portal lets you manage your call features and profiles.

Integrate with Skype for Business. With One Net Collaboration, all of the One Net features and tariff bundles are applied to Skype for Business external calls on your Windows PC, laptop or tablet.

Integrate your mobiles. When you're ready to move your mobiles over, it's easy to upgrade you to the complete One Net Business solution.

- A reliable connection
- One voicemail for your business

- Future-proofed technology
- Always ready to answer

- You're in control
- Direct your calls
